ACADEMIC PROJECT :

TITLE: FABRICATION OF AQUA DISPENSE

ABSTRACT: The project is to create a portable device that can be used to meet the water requirements of a regular household. The atmospheric air contains large amount of water vapour, fog, mist etc. In which 30% of the water is wasted. Under this situation many the climatic conditions of many Regions are suitable for generating water. The device will first condense water present in the Atmosphere and then purify it so that it can be used for drinking.
